

# GRIPPING INNOVATION

## Vulcan Series High Temperature Gripper

### Designed for Heavy-Duty, Extreme Hi-Temperature Applications

**Three Sizes Available** with holding capacities from 91 N.m [67.12 ft-lb] to 414 N.m [305.35 ft-lb]

**Hard-Coat Treated Body** to enhance durability

**Optional Fireproof Kevlar Boot** for temperatures up to 450°C prevents carbon, dust and metal debris from entering gripper mechanism

**Optional Metal Seals** allow gripper to operate in extremely high temperatures up to 450°C [842°F], eliminates downtime and maintenance (Viton Seals with grease standard, up to 160°C)

**Optional Stainless Steel Heat Shield** protects gripper from high temperature heat radiation, carbon and debris.

**Air Top or Lateral Blowing Port** cools gripper jaws while removing dust which may have entered the mechanism (Stainless Steel Heat Shield only)

**Stainless Steel Jaws and Hardware** reduces corrosion in hot and humid environment.

**Gripper can be used for both Angular and Parallel Motion applications**
